**Research for a Future
without Diabetes**

• Lübeck

Potsdam/Berlin

• Düsseldorf

• Cologne

DZD Diabetes Research School

Two days of fascinating
and exciting diabetes
research

2012 - 2018:

Barcelona | Vienna | Stockholm
Munich | Nice | Berlin

- > 400 students
- From > 20 nations
- 35 talks by top-notch professors

- ⇒ **Basic and clinical science**
- ⇒ **Perspectives from industry**

**2019 in
Barcelona**

DZD NEXT Program

Training

DZD scientists share their expertise in courses covering theoretical and practical aspects of specialized techniques in metabolic research.

Network & Mobility

DZD events are excellent opportunities for starting a professional network. The DZD provides funding for travel to conferences and sponsors research stays in partner labs.

DZD Postdoc Program

Two-year fully funded post-doctoral positions are provided. Clinicians are provided guaranteed research time in local Clinician Scientist Programs.

DZD NEXT Grants

The DZD funds two-year projects of early-career scientists with up to EUR 150,000 in order to promote first steps towards scientific independence.

Scientific Independence

DZD Young Investigator Group Leader positions, also in combination with a tenure track option, provide long-term career perspectives to excellent early-career scientists.

DZD NEXT

Expertise in Translational Research

Qualification for bridging the gap between bench and bedside research.

Multidisciplinary Approach

Bringing together multiple academic disciplines from basic, clinical and epidemiological research.

Professional Network

Connecting young and renowned scientists on a national and international level.

Next Career Steps

Support of scientists at all career levels with funding and programs for a future scientific independence.

DZD

The German Center for Diabetes Research (DZD) brings together experts in the field of diabetes research and combines basic research, translational research, epidemiology and clinical applications. The aim of the DZD is to develop novel strategies for successful, personalized detection, prevention and treatment of diabetes and its complications via an innovative, integrative research approach.
